DETAILED ACTION

Drawings

1. The application having been allowed, formal drawings are required in response to this office action.
2. The drawings were received on March 31, 2005. These drawings are accepted by the Examiner.

Allowable Subject Matter

3. Claims 1-29 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-16 is the inclusion of the limitations of first ones of the plurality of conductive regions each having a conductive via connected to the ground plane; and the ground and the signal vias are electrically connected to the conductor segment. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 17 is the inclusion of the limitations of a conductive ground via connected between at least one of the plurality of conductive regions and extending downwardly to a bottom surface of the first dielectric layer for connection to the ground plane; and the ground and the signal vias are electrically connected to the conductor segment. It is these limitations found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

The primary reason for the allowance of claims 18-22 is the inclusion of the limitations of a conductive ground via connected between at least one of the plurality of conductive regions and the ground plane; and the ground and the signal vias are electrically connected to the conductor segment. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 23-26 is the inclusion of the limitations of a first and a second conductive ground via connected between the first and the third conductive regions and the ground plane, respectively; and the ground and the signal vias are electrically connected to the conductor segment. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claim allowable over the prior art.

The primary reason for the allowance of claim 27 is the inclusion of the limitation of at least one conductive ground via connected to the conductive plate and extending to the second surface. It is this limitation found in the claim, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

The primary reason for the allowance of claims 28-29 is the inclusion of the limitations of steps of forming at least one conductive ground via connected to a first one of the plurality of conductive regions and extending to the second surface; and the

at least one ground via and the at least one signal via are further connected to the conductive segment. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
